

**Chemical / physical nature:**

PU-UV - 1000 is an aliphatic polyurethane acrylate resin that curing with UV - radiation.

**Major application:**

The PU-UV-1000 is used for printing in paper and varnish for PVC layer

**Properties**

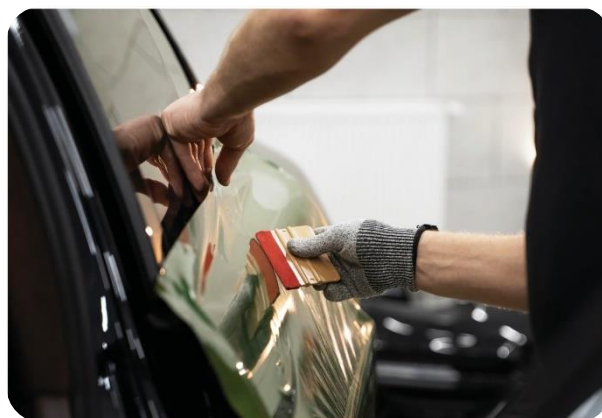

- Extremely fast surface and deep curing
- Flexibility
- Abrasion resistance
- Environmental resistance

**Stability:**

Under the above mentioned storage condition the stability of PU-UV - 1000 will be 4 month ex work.

**Storage:**

PU -UV - 1000 should be storage indoors in original Unopened and undamaged contain-ers in a dry place at storage temperature under 25 °C. Exposure to sunlight should be avoided.

**Technical information:**

Specific	PU 200	HA200	Unit
Appearance	Yellow viscous liquid		
functionality	OH	NCO	
Solid content	100	100	Percent
Viscosity	1000 - 2000	1500-3000	cps
Weight ratio	100	30-35	
Pot life	1 year	4 months
